

# MEDISAO IS AN INFORMATION SHARING AND ANALYSIS ORGANIZATION (ISAO)

Primarily composed of members of the medical device manufacturer community, MedISAO\* is dedicated to improving the sharing of security-relevant information through education and tools tailor-made for the medical device industry.

As a registered ISAO, sharing a memorandum of understanding with the FDA allows MedISAO members to align their postmarket processes with FDA recommendations.

- Satisfy key components of FDA's Guidance on Postmarket Cybersecurity management
- Take advantage of MedISAO's Coordinated Vulnerability Disclosure Process
- Get customized supply chain vulnerability alerts through our vulnerability database
- Avoid costly correction reporting via 21 CFR 806 in most vulnerability scenarios
- Access training materials and security tools
- Learn and share best practices in a rapidly evolving field

MedISAO supports small and medium medical device manufacturers (MDM's) with meeting FDA postmarket requirements and enabling cybersecurity best practices.
